MULTI-PASS CUTTING PATTERN

Tackle very large tree stumps with ease by making multiple cuts in a spiral pattern, starting from the outside and working towards the centre.

The unique pilot engages with the top surface of the tree stump drawing the tool down allowing the blades to engage with a clean horizontal cut.

As the blades rotate they shave the wood into a tidy pile and pull the planer down further.

When the planer has achieved a deep cut, reposition to overlap the first hole and repeat the process until all of the stump is removed.

Stump removal is now a clean and quiet operation which can be performed quickly and efficiently by a single operator.
